Ellen Ochoa

Ellen Ochoa made her mark by becoming the first Hispanic American woman to go to space with a nine-day mission in 1993.

Ochoa was born in 1958 in Los Angeles, California, years after her paternal grandparents immigrated from Mexico. She first obtained her physics degree from San Diego State University and later her masters and doctorate from Stanford University's department of electrical engineering by 1985.

Through her impressive research work, NASA selected Ochoa in 1991 and she became an astronaut in July of that year. Two years later, Ochoa made history on board the Space Shuttle *Discovery* on a mission to study the Earth's ozone layer. She later completed three more missions.
